

# The Garden Friends Trail

**BRASS RUBBING BOOKLET**

1

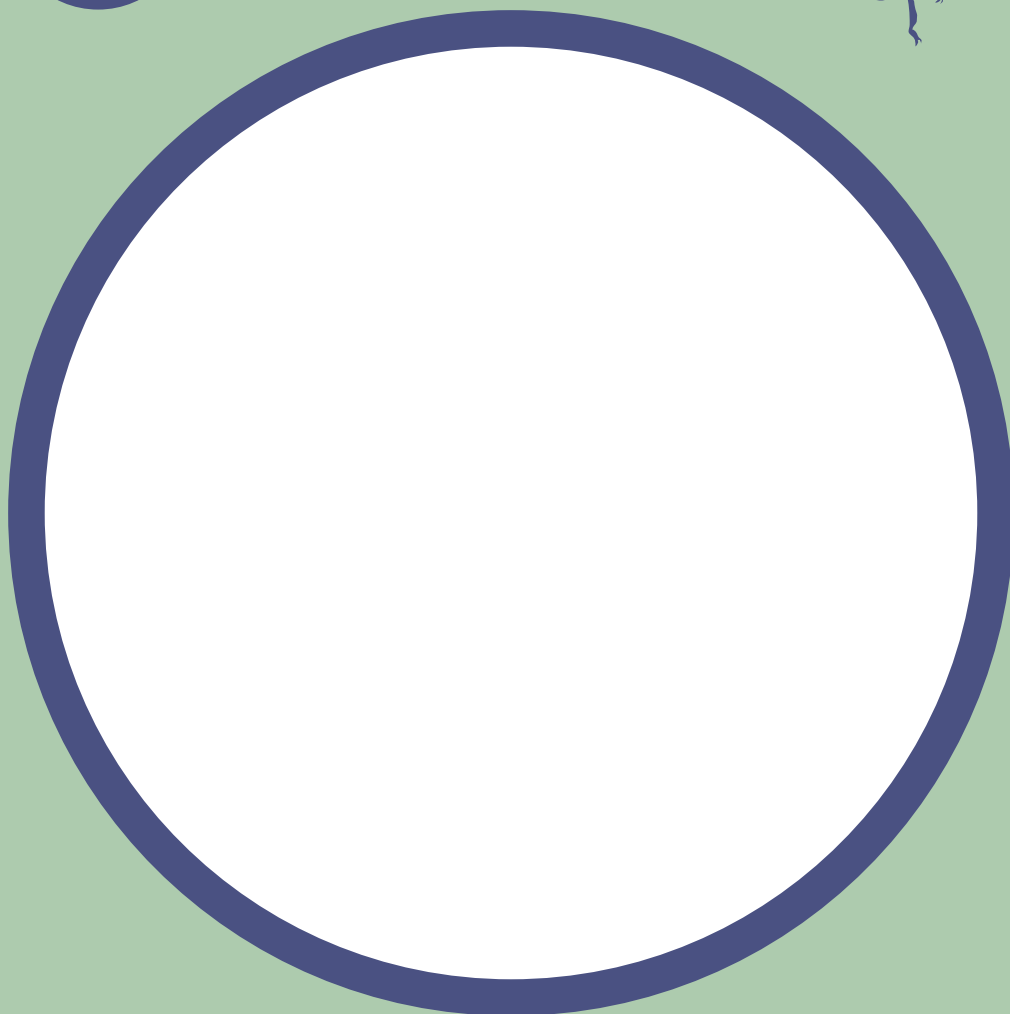

# Sparrow

Attribution: Adamo

House sparrows can be seen all year round. Their nests are lined with dry grass, feathers, hair, string or paper and can be found in buildings or in hedges.

2

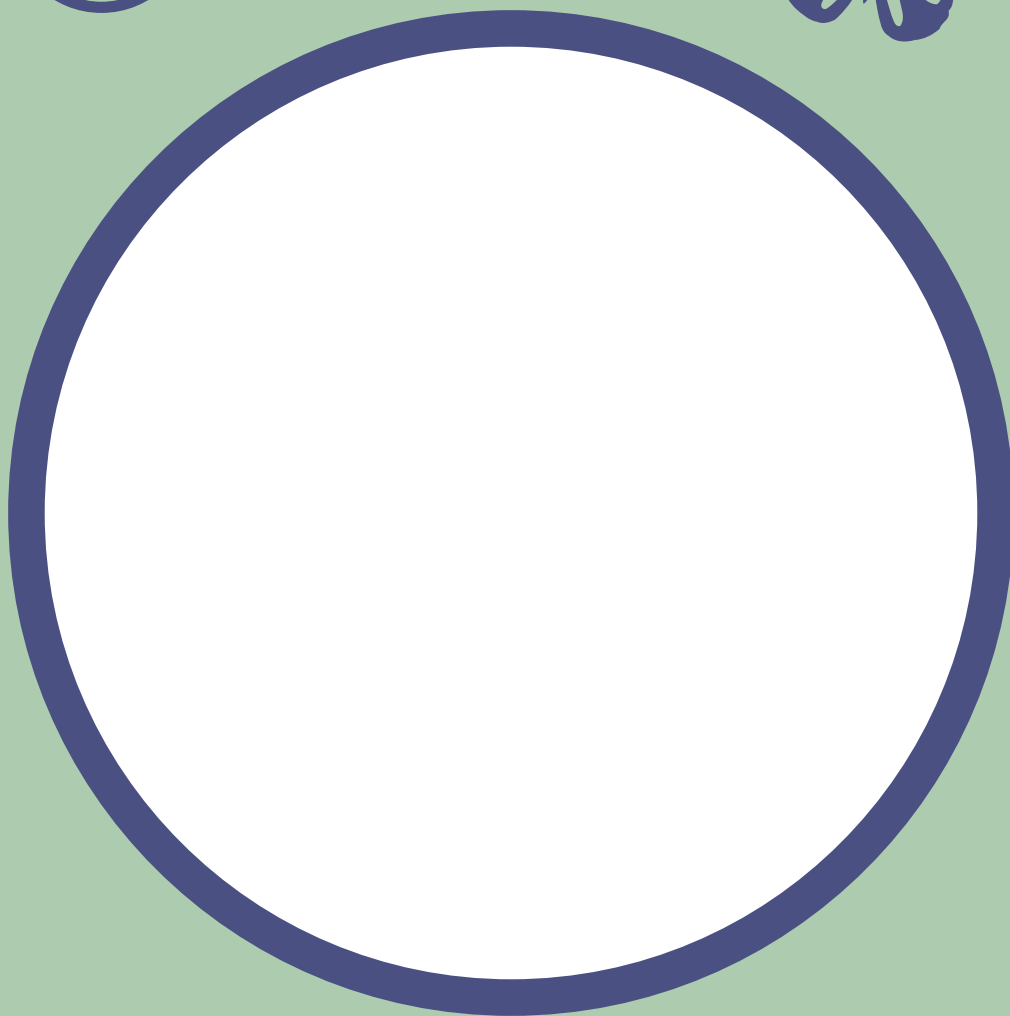

# Ladybird

Attribution: Silas Jones

There are 46 species of ladybird in Britain.  
They hibernate in cracks in walls, bark or plant stems in the winter.

3

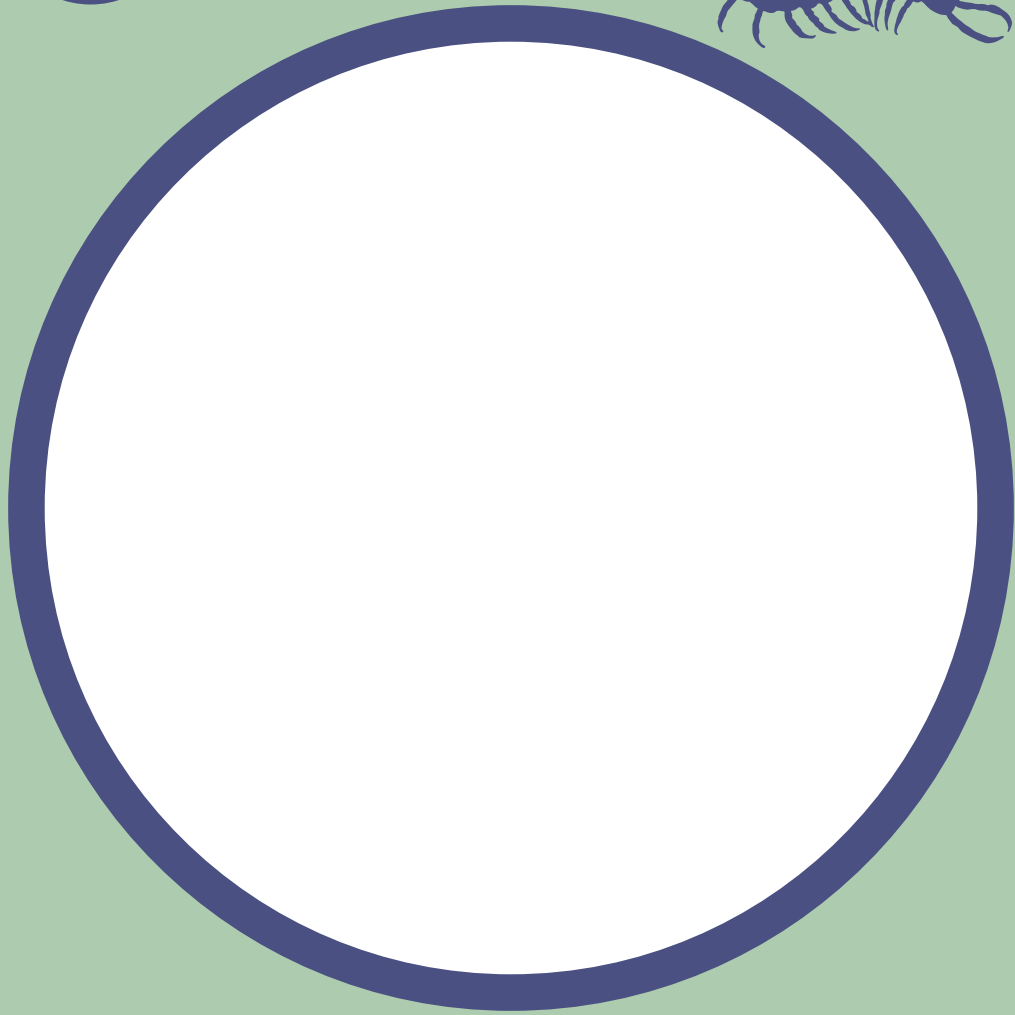

# Butterfly

Attribution: Alan Fryer

Butterflies have extremely long tongues so they can feed on nectar. They love Buddleia's so much its called the butterfly bush!

4

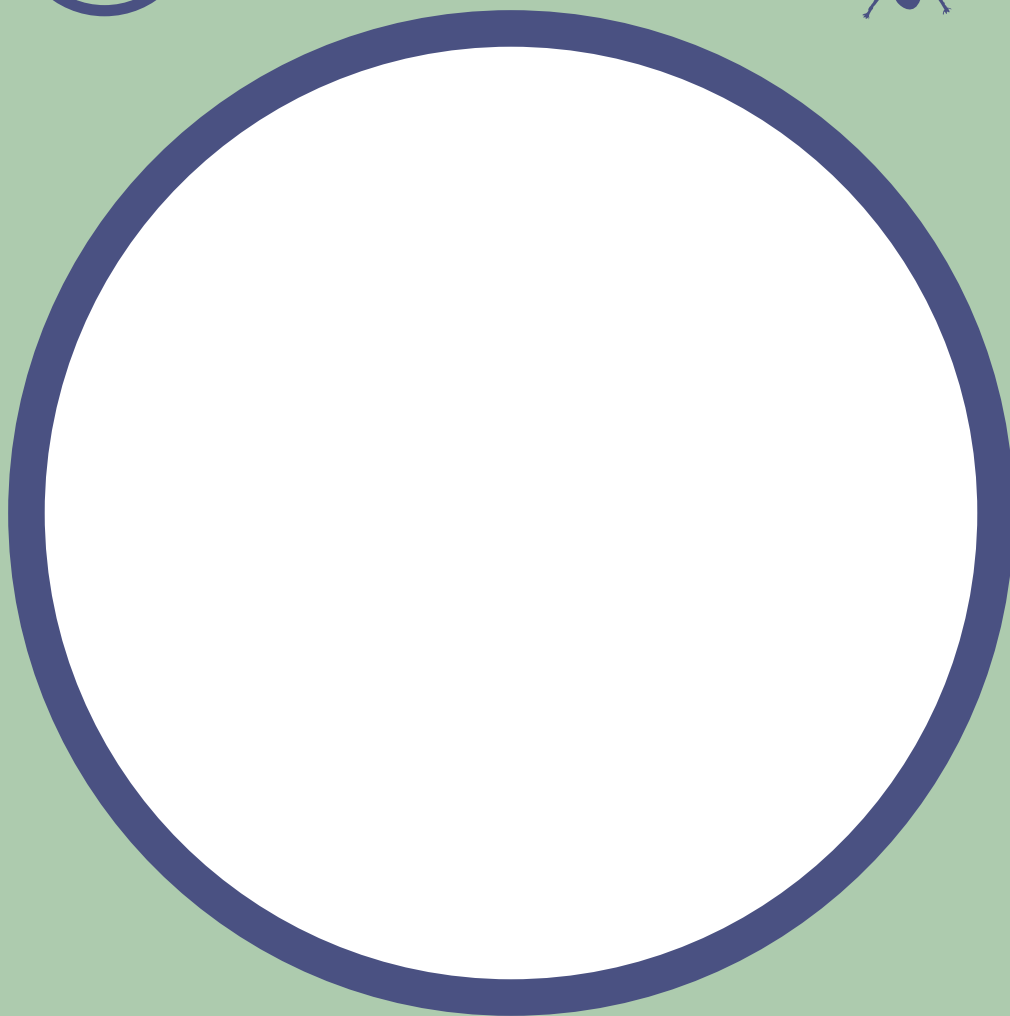

# Centipede

**Attribution: Bramblejungle**

Centipedes hunt for food and can paralyse prey with their venomous jaws. Centipedes bodies are flat, they love hiding under logs and stones.

5

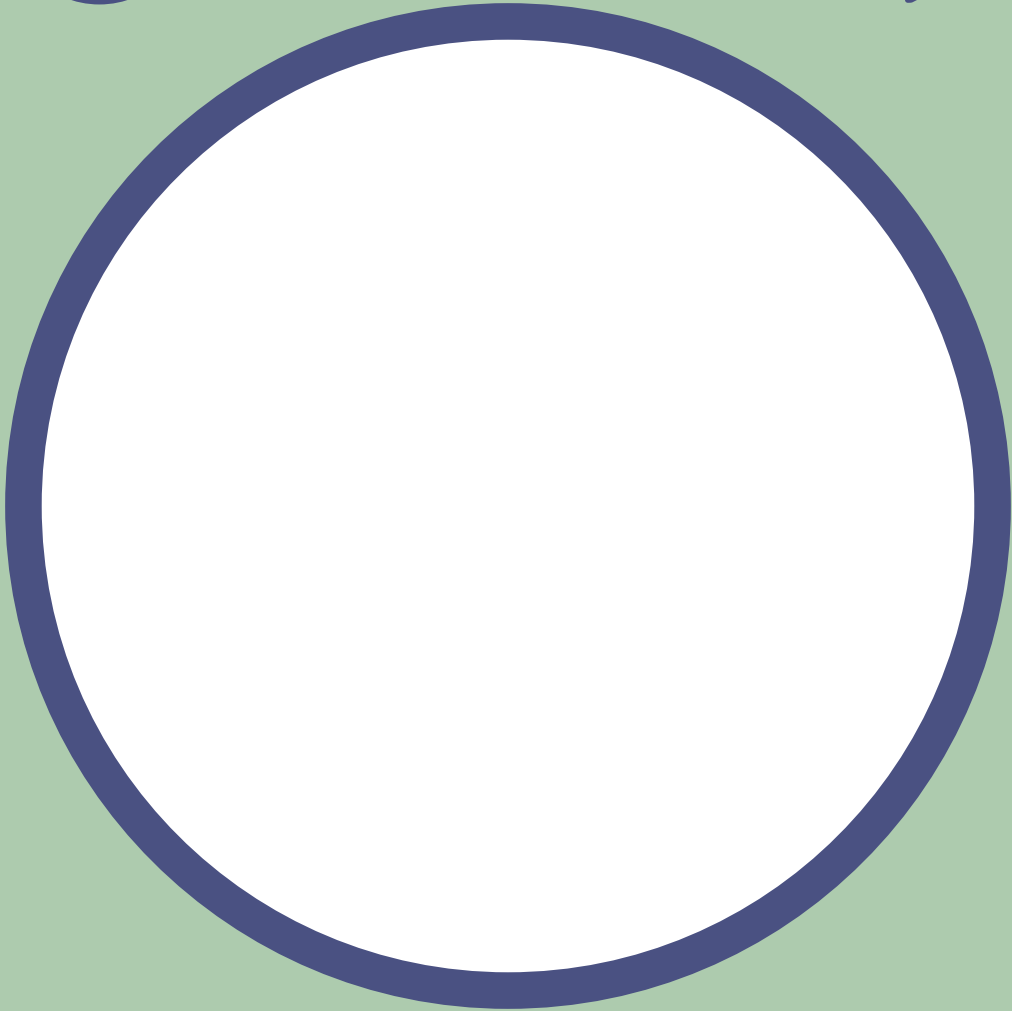

# Hoverfly

Attribution: Alvesgaspar

Hoverflies have yellow and black stripes like wasps but don't sting - they just pretend. There are over 250 types of hoverfly in the UK. Hoverflies like flat-headed flowers like daisies and yarrow.

6

# Frog

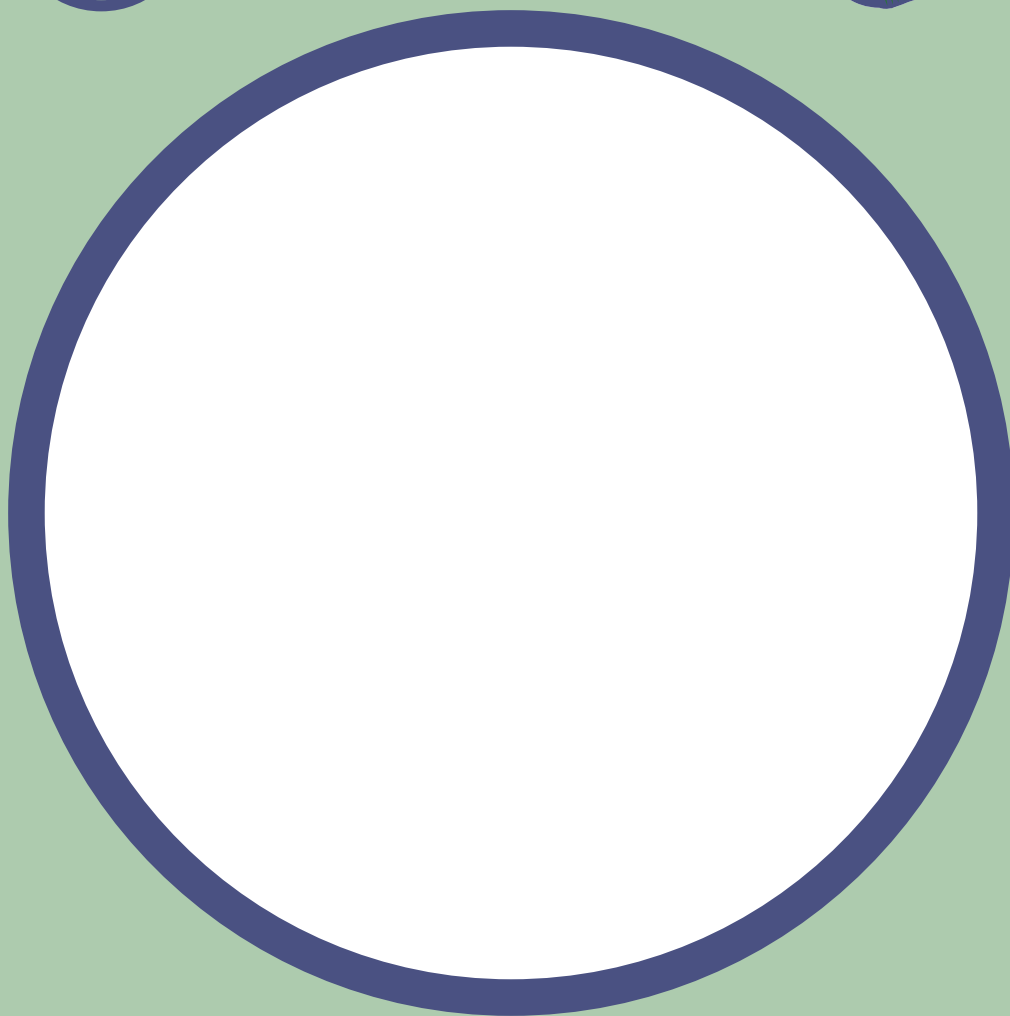

**Attribution: Windmill Hill City Farm**

Frogs have no necks and can't turn their heads but their eyes can view all around them even when the rest of their body is underwater.

This photo is the pond at Windmill Hill City Farm in Spring time!

7

5

# Earthworm

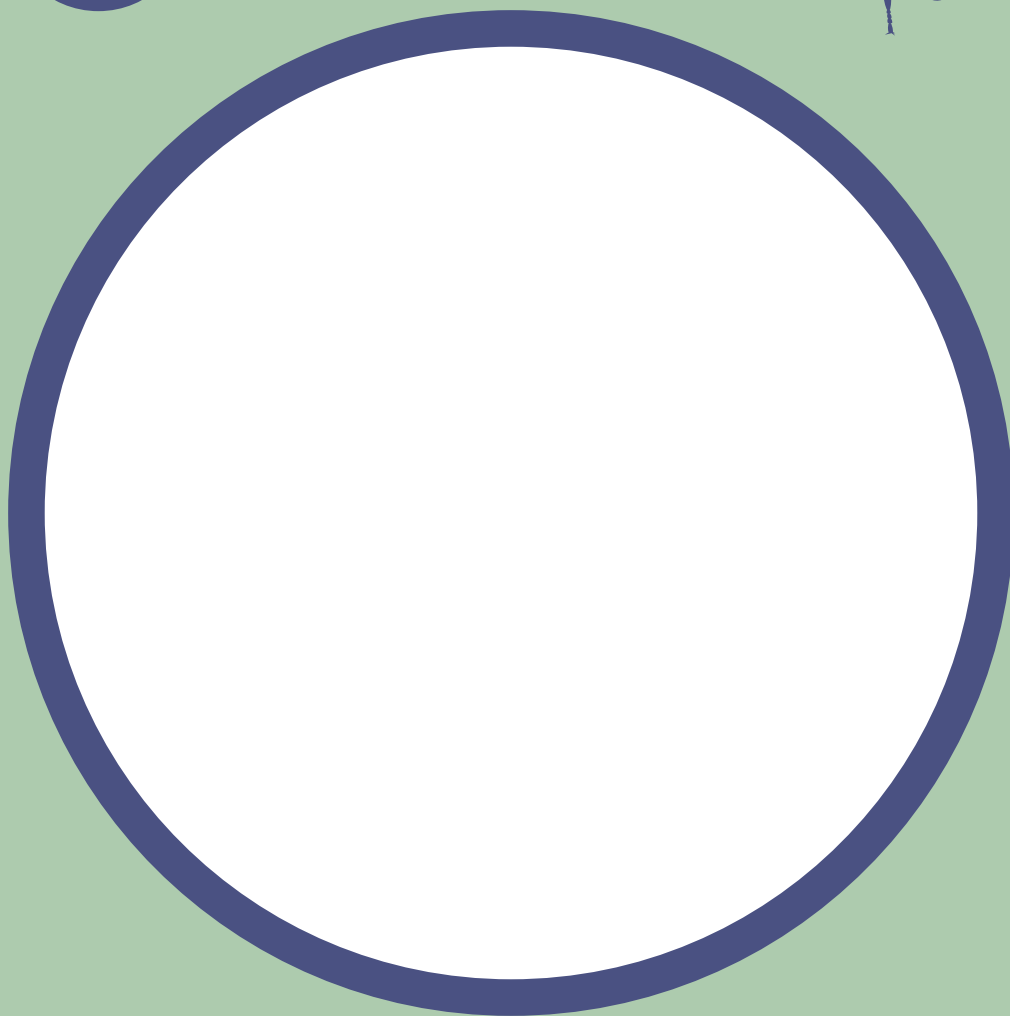

Attribution: Masti Ki Pathshala

There are at least 25 species of earthworm in Britain and have names such as Lob, Green, Chestnut and Redhead. Brandling and Compost worms like to live in the garden and eat rotting vegetation. They magically turn it into compost!

Can you think of any more names you could call a worm?

8

# Bumblebee

Attribution: Christian Bauer

Bumblebees depend on flowers for food.  
Bumblebee nests are found underground or on the surface, in areas like long grass or compost heaps.

**Draw your own garden friends**
